Education

University of Waterloo Sept 2025 – Apr 2029
*Bachelor of Computer Science, Computer Science — **4.0 GPA*** *Waterloo, Ontario*

- Ted Rogers Legacy Scholarship **(full-ride)** for academic excellence and leadership in technology

Activities & Societies: Women in Computer Science, Ultimate Frisbee Intramurals
Coursework: Data Structures/Algorithms, Object-Oriented Software Development, Software Engineering Principles

Experience

Software Developer Intern Jul 2025 – Aug 2025
Royal Bank of Canada (Toronto, ON) *Tech Stack: Python, Rundeck, Ansible, Linux*

- Maximized system uptime by architecting a **Python** and **Ansible-based DevOps pipeline**, resulting in a **90x performance gain** as task latency dropped from **15 minutes to 10 seconds**
- Streamlined regional operations for the RBC Caribbean Technology team, reclaiming **27+ monthly** engineering hours by automating manual Linux service restarts into a Jira-governed, **one-click workflow**
- Modernized legacy infrastructure for CI/CD **GitHub Actions** migration, achieving a secure remote execution environment by orchestrating **Ansible** playbooks and **SSH protocols**

Software Developer Intern Jul 2024 – Aug 2024
Royal Bank of Canada (Toronto, ON) *Tech Stack: Java, Spring Boot, Angular, HTML/CSS, Typescript, Figma*

- Enhanced financial advising precision by developing a full-stack **Spring Boot** and **Angular** validation service that automatically audits plans against **34 complex business rules** using **Cron-scheduled** tasks
- Boosted financial plan **reliability by 20%** for over **3000** financial planners nationwide, while **cutting 7.5 hours** of weekly management overhead through engineering an automated error-detection infrastructure and **CI/CD pipeline**
- Strengthened cross-functional reporting by spearheading the end-to-end **UI/UX** development of a **high-visibility dashboard**, presented to **executive** leadership and built in full compliance with internal design standards

Ski & Snowboard Instructor Nov 2023 – Mar 2025
Lakeridge Ski Resort (Uxbridge, ON)

- **Dual certified** for both Ski and Snowboard Instruction
- Accelerated technical riding proficiency for **100+ clients** aged **4 to 40+** by breaking down complex physical techniques into **simple, actionable** coaching steps
- Maintained a **100% safety record** in high-stress environments through **real-time** risk assessment and strict adherence to resort emergency protocols

Projects

Gnome Biome *Tech Stack: HTML/CSS, JavaScript, OpenAI API, TinyMCE*

- Architected a full-stack wellness platform using **TinyMCE** and **REST APIs** to automate real-time mental health tracking, earning **Best Beginner Project** at Jamhacks (the **largest high school hackathon in Canada**)
- Deployed an OpenAI-integrated chatbot using prompt engineering on clinical datasets to provide 24/7 support

TomoTasker *Tech Stack: Java, Swing*

- Engineered a Java tool with **persistent storage** and ambient audio environments to streamline task management
- Developed custom draggable **Swing components** to optimize **multi-window navigation** and improve user focus

Technical Skills

Languages: Python, Java, JavaScript, C/C++, SQL, HTML/CSS
Frameworks & Libraries: Spring Boot, Django, Angular, React, Next.js, Tailwind CSS
Tools & Technologies: Ansible, Rundeck, GitHub Actions, Linux, Cron, JUnit, Mockito, Figma, VS Code, Git, Jira
